

Increased traffic movement on Warrambool St during October 2024

During early October, construction contractor ADCO will progressively relocate their site compound at Animoo Avenue, to the fenced compound at Warrambool St.

How will the work affect you?

We recognise that building new infrastructure can be disruptive to staff and neighbours. All activities are carried out with the health and safety of the local community as our top priority. We endeavour to keep noise and dust to a minimum and will make every effort to minimise impacts. Please note:

- Temporary site offices will be installed in the site compound at Warrambool St on **Wednesday, 9 October and Thursday, 10 October**.
- Trucks will use the Nurses Training School carpark to access the site compound.
- For your safety, please follow the directions of traffic management controllers.
- Works will continue following the installation, as the offices are connected to services.
- Access to the Nurses Training School car park will remain available to health services staff.

Keeping you informed

Thank you for your patience while we complete this important project for the Griffith community. **Please call Andrew Galvin (ADCO) on 0406 412 606 if you have any enquiries.**
